The retractable solution

# EVoline® Port

EVoline Port let sockets and cables simply disappear. Just the collar and cover of the Port are visible on the work surface.

The easy pull-up motion let the high-quality aluminium body appear and subsequently a push-down motion let it disappear below the surface even with attached plugs. The patented rocking cover creates enough space for a cable outlet.

Dimensions in mm

<b>Housing</b>	Aluminium, anodised or lacquered
<b>Rocking Cover</b>	Stainless steel Lacquered plastics
<b>Collar</b>	Lacquered plastics
<b>Installation</b>	Flush-mounted Diameter Ø 102 mm
<b>Surface thickness</b>	10 – 50 mm
<b>Configurable</b>	yes
